EVENTO

You are all invited on Thursday 6 March, from 10am to 8pm, at the TreP Design Lab of Mariano Comense, Via Sant'Alessandro 153, for "Windows & Wall", the preview of our '25 Collection.

During the day we will present you:

"Endless", the new wall covering proposal, in the new wood veneer, lacquered and 3D finishes;

"Surface Swing", the aluminum and glass swing door collection.

"Contract Plus" "Cement", "Plaster" and "Olmo", the new Matrix finishes from the Contract collection

"Windows Collection", the designed windows and doors by TreP and LUX SERR Serramenti;

From 10 to 11.30 you will be our guests for breakfast and from 6 to 8 pm for a buffet aperitif.

Technical moments are scheduled at 11am, 3.30pm and 6.30pm, with the presence of our consultants and live social media at 6pm.

To confirm your presence and receive a welcome gift, write to info@trep-trepiu.com

Surface Swing

The new collection of aluminum swing doors that we are previewing at Windows & Wall is characterized by the presence of a minimal profile and the possibility of being combined with three different types of jambs, from the more minimal Swing 1, to the more complex, which allows the entire perimeter of the wall to be covered Swing 3.

They are available in all our aluminum and glass finishes and will replace the historic Planus collection.

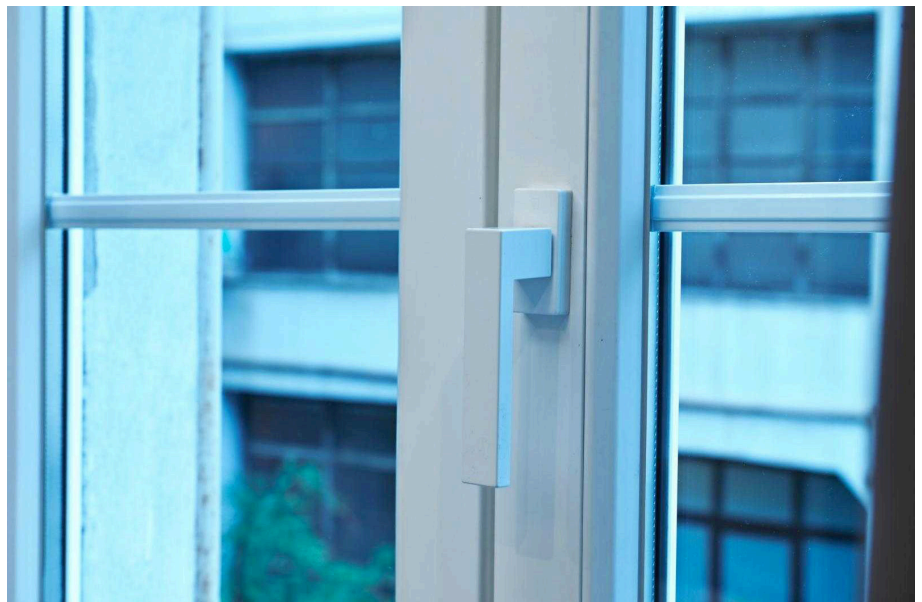

They are already available for production and we will release the price list shortly.

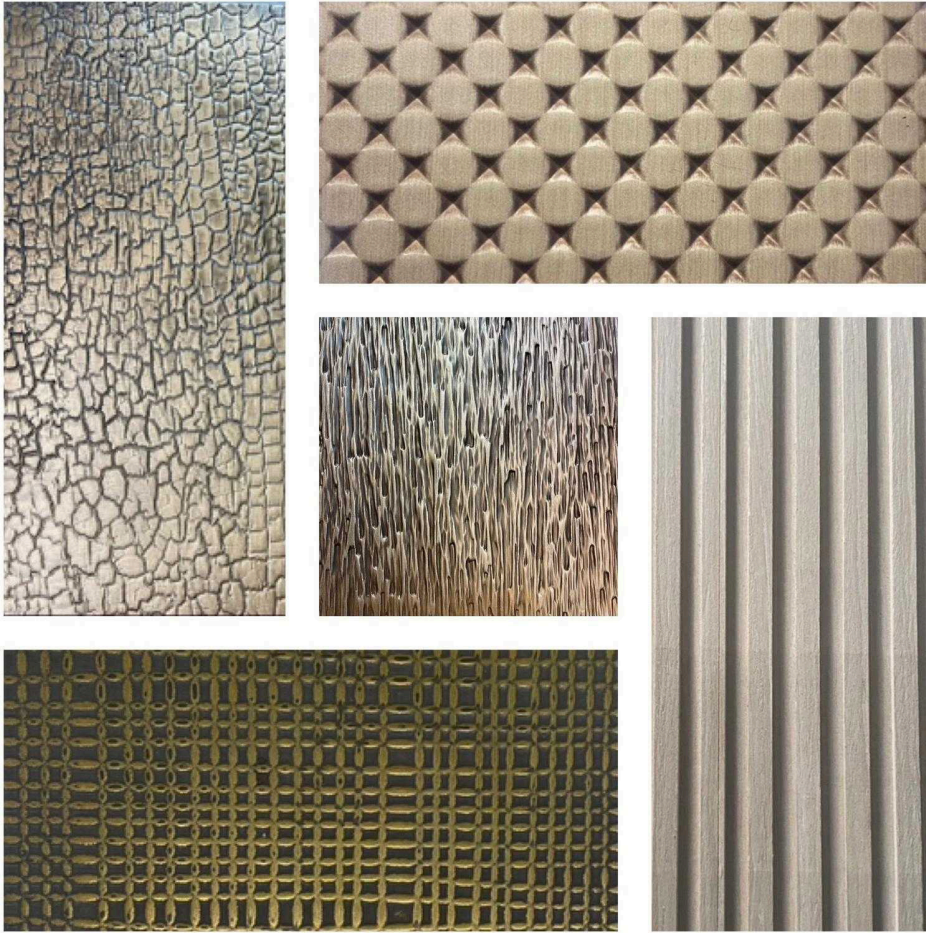

Windows Collection

Created in collaboration with LuxxSerr, the new collection of windows is the big news of the current year.

Born already large, available in different materials, such as wood, aluminum and PVC, it will have a dedicated corner in our showroom in Mariano Comense and in the TreP Design Lab in Olginate (Lecco) and Camparada (Monza).

We present you a quality product that will also be complete with all the required accessories, such as mosquito nets.

ENDLESS 3D

To enrich and make our new boiserie program more valuable, we have included new material finishes in the collection, which are available both in the “raw” version and with our lacquered finishes, including the Kerakoll Color Collection.

A proposal that expands the range of materials that we make available to designers to create modern and refined domestic environments to our absolute content.

CONTRACT PLUS "CEMENTO" "GESSO" AND "OLMO"

The evolution of fine laminate finishes allows us to present to the market three new particular and refined finishes.

The "Cement" and "Gesso" finishes, which have already had positive feedback in the first previews, are suitable for modern settings, in city contexts such as lofts and open spaces with minimal furnishings, while the Elm effect for homes with more classic furnishings.

Come and discover them, we are sure you will appreciate them.
